Product Datasheet

Washing Buffer TRIS 10x CR145

Product Name Washing Buffer TRIS 10x

Catalog Number CR145

Description Wash Buffer for immunoassays

Tested Applications

WB, IHC, Multiplex Assay, Immuno-PCR, ELISA

Brand CANDOR

Storage 2 - 8 °C or -15 to -30 °C (tolerates repeated freezing and thawing

cycles)

Note Salt crystals may precipitate due to storage at 2 - 8 °C or

freezing. Therefore, to prepare the working solution, the Washing Buffer must be warmed to room temperature beforehand, which will dissolve any salts that may have precipitated. The buffer should be thoroughly mixed again by shaking immediately before use. The working solution is prepared from the stock solution by diluting 1:10 with distilled or demineralized water and should be used on the same day. Washing Buffer can be used in automated washers depending on the salt tolerance of the washer. It is essential to observe the specifications of the respective manufacturer! Suitability of Washing Buffer for a specific assay

has to be tested by the user

Preservatives Contains < 0.0014 % [w/w] reaction mass of CMIT/MIT (3:1)
