RT-PCR Discovery Pack #7002

Product Name	RT-PCR Discovery Pack
Catalog Number	#7002
Description	<p>Discover Your Ideal RT-PCR Solution – All in One Bundle</p> <p>The RT-PCR Discovery Pack is your chance to explore three of our most advanced and versatile RT-PCR products, at an exclusive 30% discount. Designed for assay developers and researchers who demand performance, speed, and flexibility, this bundle lets you compare key formulations side-by-side and identify the best match for your workflow.</p> <p>Included in the RT-PCR Discovery Pack:</p> <ol style="list-style-type: none">1. RT-qPCR Lyo-Ready Mix, optimized for high-throughput multiplexing, this lyo-ready mix delivers fast protocols and excellent performance across a wide range of targets. Ideal for applications where speed and lyophilization compatibility are critical.2. Volcano3G RT-PCR Probe 2x Master Mix, a thermostable, probe-based RT-PCR mix designed for true lyse-and-detect workflows. With the ability to perform reverse transcription at elevated temperatures, it's perfect when RNA secondary structures or residual RNases pose a challenge. Simple, streamlined protocols with reliable results.3. HiPlex qRT-Probe Mix, a premium, high-performance mix built for complex multiplex assays. HiPlex offers robust sensitivity, specificity, and excellent amplification efficiency, making it your go-to for demanding RT-qPCR applications where precision matters most. <p>Instead of relying on trial and error across vendors, this pack allows you to evaluate our best RT-PCR solutions in parallel. Whether your focus is rapid diagnostics, inhibitor-rich samples, or complex multiplex detection, this bundle helps you find your perfect formulation.</p>
Tested Applications	End-Point, Real-Time, Lyophilized
Brand	Medix Biochemica
Storage	-20°C
Content	RT-qPCR Lyo-Ready Mix (125 Reactions) - #Trial-4501 Volcano3G RT-PCR Probe 2x Master Mix (100 Reactions) - #6101S HiPlex qRT-Probe Mix (200 Reactions) - #6801S
