Note Nilsson et al. (2001) analyzed epitopes of 30 different LH mAbs.

Antibody 5304 was classified as belonging to epitope group beta 1 recognizing intact LH and its beta subunit as well as a common variant of LH. Antibody 5304 did not cross react with hCG, TSH or

FSH.

**Isotype** IgG1

Clonality Monoclonal

**Epitope** Beta 1 as described in Nilsson et al. (2001) Two antibodies

binding to the same, or closely located epitopes, belong to the same group and hence cannot be used as a pair in a sandwich assay. Epitope group numbering does not give any detailed

information where the epitope is located.
