

Validated Antibodies Enable Reliable Point-of-Care and IVD Testing for SARS-CoV-2

Medix Biochemica Group offers a broad range of high purity SARS-CoV-2 antibodies for POC testing and continues to expand its product offering as the COVID-19 pandemic unfolds.

Medix Biochemica SARS-CoV-2 rigorously validated antibody reagents are produced consistently and at scale to offer almost instantaneous results for assay developers.

Antibody validation strategies include assessment of immunoreactivity, sensitivity, and cross-reactivities, as well as detailed kinetic analysis based on biolayer interferometry (BLI).

Additionally, testing on patient sample material and provision of matched antibody pairs provides confidence in assay performance, helping bring your product to market sooner.
