Medix Biochemica

Anti-h Albumin 6501 SPRN-5

Product overview	
Catalog number	100749
Specificity	Antibody recognizes human albumin
Description	Monoclonal mouse antibody, cultured <i>in vitro</i> under conditions free from animal-derived components.
Product buffer solution	37 mM citrate, 125 mM phosphate, pH 6.0, 0.9 % NaCl, 0.095 % NaN $_{\rm 3}$ as a preservative
Shelf life and storage	36 months from manufacturing at 2–8 °C
Subclass	lgG₁
Analyte description	Albumin normally constitutes about 60 % of human plasma proteins and is produced in the liver. It is important in regulating blood volume by maintaining the oncotic pressure. It also serves as carrier for molecules of low water solubility, including lipid soluble hormones, bile salts, unconjugated bilirubin, free fatty acids, and drugs. Low albumin (hypoalbuminemia) may be caused by liver disease, nephrotic syndrome, burns, protein-losing enteropathy, malabsorption, malnutrition, late pregnancy, genetic variations and malignancy. High albumin (hyperalbuminemia) is almost always caused by dehydration.
Parameters tested on ea	ch lot
Product appearance	Liquid, may turn slightly opaque during storage
Product concentration	5.0 mg/ml (+/- 10 %)
Immunoreactivity	
	80–120 % compared to the reference sample in an FIA test
IEF Profile	80–120 % compared to the reference sample in an FIA test 6.3–7.4
IEF Profile Purity	
	6.3–7.4
Purity	6.3–7.4
Purity Kinetic parameters	6.3–7.4 ≥ 95 %
Purity <u>Kinetic parameters</u> Association rate constant	6.3–7.4 ≥ 95 % Not Determined (N/D)
Purity <u>Kinetic parameters</u> Association rate constant Dissociation rate constant	6.3–7.4 ≥ 95 % Not Determined (N/D) N/D

	Stability taating is performed in t	ha product buffer to an

Stability testing is performed in the product buffer to see whether different temperatures affect the antigen binding, charge or composition of the antibody. Please note that the shelf life given on the first page is based on real time stability testing at 2-8 °C in the product buffer.
