Anti-h GFAP R13505 SPTN-5

Product overview

Catalog number 140060

Specificity Antibody recognizes human GFAP

Description Recombinant rabbit antibody, cultured *in vitro* under conditions free from

animal-derived components.

Product buffer solution 50 mM Na-citrate, pH 6.0, 0.9 % NaCl, 0.095 % NaN₃ as a preservative

Shelf life and storage Unspecified, storage at 2–8 °C

Subclass Rabbit IgG

Analyte description Glial fibrillary acidic protein (GFAP) is an intermediate filament-III protein

uniquely expressed in astrocytes within the central nervous system. Cerebrospinal fluid and serum GFAP levels elevate due to damages in

nervous system making GFAP a promising biomarker for neuroinflammation in neurodegenerative diseases and injuries.

Parameters tested on each lot

Product appearance Liquid, may turn slightly opaque during storage

Product concentration 5.0 mg/ml (+/-10 %) (A280 nm, 1 mg/ml, 1 cm = 1.4)

Immunoreactivity 80–120 % compared to the reference sample in an FIA test

IEF Profile 5.9 - 6.7

Purity $\geq 95\%$

Kinetic parameters

Association rate constant 2.0 x 10⁵ 1/Ms

Dissociation rate constant Does not dissociate under conditions used.

Affinity constant Not applicable (N/A)

Determination method BLI (Octet RED96e)

Determination antigen Human recombinant GFAP, Hytest (Cat 8G45)

Product specification ANTIBODY

2025-12-01

Cross-reactivities Does not recognize vimentin, desmin or peripherin.

Epitope Between amino acids 60-383 of human GFAP.

Pair recommendations

		DETECTION				
		R13501	R13502	R13503	R13504	R13505
CAPTURE	R13501	-	+	+	+	+
	R13502	+	-	+	+	+
	R13503	-	-	-	-	-
	R13504	-	-	-	-	-
	R13505	+	+	+	+	-

Following pairs are especially recommended for the below mentioned assays: FIA: R13501 (capture) – R13505 (detection), and R13505 – R13504

Please note that pair recommendations are based on results obtained by our laboratory. Equally good results may be obtained using other pairs and therefore these recommendations are only indicative.

Platforms tested FIA

Antigens tested N/D

Product stability TEMPERATURE, TIME RESULT

-70 °C, 21 days OK
-20 °C, 21 days OK
+4 °C, 21 days OK
+35 °C, 21 days OK
+45 °C, 7 days OK

Stability testing is performed in the product buffer to see whether different temperatures affect the antigen binding, charge or composition of the antibody. Please note that the shelf life given on the first page is based on real time stability testing at 2–8 °C in the product buffer.
