Anti-h Trypsinogen-2 8607 SPTN-5

Product overview

Catalog number 100108

Specificity Antibody recognizes human trypsinogen-2

Description Monoclonal mouse antibody, cultured *in vitro* under conditions free from

animal-derived components.

Product buffer solution 50 mM Na-citrate, pH 7.0, 0.9 % NaCl, 0.095 % NaN3 as a preservative

Shelf life and storage 12 months from manufacturing at 2–8 °C

Subclass IgG₁

Analyte description Trypsinogen is the precursor form of the pancreatic enzyme trypsin. It is

found in pancreatic juice, along with amylase, lipase, and

chymotrypsinogen. It is activated by enteropeptidase, which is found in the intestinal mucosa, to form trypsin. Once activated, the trypsin can activate more trypsinogen into trypsin. Trypsin cleaves peptide bond on carboxyl side of basic amino acids. High serum trypsinogen levels are seen in acute pancreatitis, and cystic fibrosis. Determination of urine trypsinogen-2 is also a useful test to detect acute pancreatitis and to evaluate disease

severity.

Parameters tested on each lot

Product appearance Liquid, may turn slightly opaque during storage

Product concentration 5.0 mg/ml (+/- 10 %)

Immunoreactivity 80–120 % compared to the reference sample in an FIA test

IEF Profile 6.0–6.9

Purity ≥ 95 %

Kinetic parameters

Association rate constant Not Determined (N/D)

Dissociation rate constant N/D

Affinity constant 1.6 x 10⁸ 1/M

Determination method Radioimmunoassay (RIA)

Determination antigenTrypsinogen-2, Medix Biochemica, in-house

Product specification ANTIBODY

2023-04-25

Cross-reactivities Human Trypsin-1 2 % (Scripps, Cat T0614, Lot 923782)

Human Trypsin-2 6 % (Medix Biochemica, in house, A98/97)

Epitope N/D

Pair recommendations

		DETECTION	
		8603	8607
CAPTURE	8603	-	+
	8607	+	-

Please note that pair recommendations are based on results obtained by our laboratory. Equally good results may be obtained using other pairs and therefore these recommendations are only indicative.

Platforms tested FIA

Antigens tested N/D

Product stability TEMPERATURE, TIME RESULT

-70 °C, 21 days N/D
-20 °C, 21 days N/D
+4 °C, 21 days N/D
+35 °C, 21 days N/D
+45 °C, 7 days N/D

Stability testing is performed in the product buffer to see whether different temperatures affect the antigen binding, charge or composition of the antibody. Please note that the shelf life given on the first page is based on real time stability testing at 2–8 °C in the product buffer.
