

Washing Buffer (10x)

Product overview

Catalog number	CR140 (Washing Buffer PBS (10x)) CR141 (Washing Buffer PBS without Tween (10x)) CR145 (Washing Buffer TRIS (10x)) CR146 (Washing Buffer TRIS without Tween (10x))
Description	Wash Buffer for immunoassays
Storage	2 – 8 °C or -15 to -30 °C (tolerates repeated freezing and thawing cycles)
pH-value at 19.0 – 21.0 °C (1:10 dilution)	7.2 ± 0.2 (catalog no. CR140, CR145, CR146) 7.3 ± 0.2 (catalog no. CR141)
Preservative	Contains < 0.0014 % [w/w] reaction mass of CMIT/MIT (3:1)
Expiry date when stored unopened	See label on the bottle Use working solution immediately!
FOR RESEARCH OR FURTHER MANUFACTURING USE ONLY	

Instructions for use

Salt crystals may precipitate due to storage at 2 - 8 °C or freezing. Therefore, to prepare the working solution, the Washing Buffer must be warmed to room temperature beforehand, which will dissolve any salts that may have precipitated. The buffer should be thoroughly mixed again by shaking immediately before use. The working solution is prepared from the stock solution by diluting 1:10 with distilled or demineralized water and should be used on the same day.

Washing Buffer can be used in automated washers depending on the salt tolerance of the washer. It is essential to observe the specifications of the respective manufacturer!

Suitability of Washing Buffer for a specific assay has to be tested by the user.
