Actim[®] Rapid Tests

Fast diagnosis,
right when it's needed

Actim[®] rapid tests give quick and reliable results at the point-of-care, helping to choose the right treatment for those who need it, when they need it.

Actim[®] Rapid Tests

Actim[®] for pregnancy monitoring – targeting resources for those who need them the most

Actim[®] tests support the early and reliable detection of pregnancy complications. By indicating those at risk, they help to target resources to patients who need extra medical attention.

Actim[®] PROM

The most accurate test for detecting the premature rupture of fetal membranes

Unique to the market, Actim[®] PROM identifies even the smallest ruptures, and it can be used on all pregnant women, even those with bleeding. The results are given in just 5 minutes.

Actim[®] Partus

A simple bedside test for ruling out the risk of preterm or imminent delivery

By reliably identifying those at real risk of preterm delivery, Actim[®] Partus helps to avoid unnecessary treatment of patients having harmless contractions. It can be used from week 22 until birth, even in the presence of interfering substances.

Both test results can also be interpreted digitally using the Actim[®] 1ngeni instrument.

Actim[®] for the gastrointestinal system – clean & convenient for testing disorders on the spot

Actim[®] tests enable the rapid and non-invasive on-site screening of gastrointestinal disorders. They are hygienic and convenient to use – for both the patient and the medical staff. And there's no need for dietary restrictions.

Actim[®] Calprotectin

Simple detection and monitoring of intestinal inflammation

Actim[®] Calprotectin is a semiquantitative test for rapidly distinguishing between inflammatory bowel disease (IBD) and non-inflammatory conditions. With Actim[®], prolonged, uncomfortable, and costly examinations can be avoided.

Actim Combi[®] Hemoglobin. Transferrin.

A smart and clean way to find any gastrointestinal bleeding all at once

The Actim Combi[®] Hemoglobin Transferrin test covers the whole gastrointestinal tract to detect bleeding. Hygienic, non-invasive sampling and quick results in just 10 minutes make the test procedure simple and convenient.

Actim[®] Fecal Blood

A highly-specific test to find occult blood in feces

The rapid Actim[®] Fecal Blood test will detect any occult blood in feces even if there are no visible signs. Hygienic, non-invasive sampling and a fast & simple test process make Actim[®] the most practical choice.

Actim[®] Pancreatitis

A unique way to screen for acute pancreatitis

Based on the most accurate biomarker trypsinogen-2, Actim[®] Pancreatitis is the only test on the market that can identify acute pancreatitis at any phase of inflammation. Actim[®] can provide a quick and early screening without the need for laboratory equipment.

Actim[®] for infectious diseases – specific for early choice of proper treatment

Actim[®] bedside tests quickly help to identify patients in need of special medical care. They also aid in preventing pandemics and in reducing the unnecessary use of medication, such as antibiotics.

Actim[®] CRP

Semiquantitative CRP results quickly and anywhere

In just 5 minutes, the Actim[®] CRP test can estimate if an infection is viral or bacterial. Requiring just one drop of blood, it delivers accurate results anywhere - with no instrument needed.

Actim[®] Influenza A&B

Fast and easy flu testing without the need for a laboratory

Highly specific to a wide range of influenza subtypes, including swine and avian flu, the Actim[®] Influenza A&B test gives a reliable diagnosis in 10 minutes.
